For Your Spanish Speaking Students

Early in 2005 it was suggested that we should have printed material in Spanish for those ABC students that were more comfortable reading Spanish versus English.

Navegando America is now available from AUXCEN through your DSO-MA or via your normal ordering channels for PE materials. This is a special order item and the books are shipped in packets of five each. While not 100% identical to America's Boating Course, it is BoatEd's Spanish version of Boat America...a book that is very similar to America's Boating Course in content.

Our suggestion is that you teach the course in English and provide the Spanish text to the students who would prefer it.
